SUMMARY

Developer // Builder // Problem Solver

Software developer focused on agentic AI, developer tooling, web systems, robotics, and IoT. Experienced in building autonomous, repository-scale engineering workflows and production-oriented AI systems.

SKILLS

Languages Rust | C++ | Python | Nix

Web React | SvelteKit | WASM | TypeScript

Technologies Robotics | IoT | Computer Vision | Agentic AI | Automated Testing | RAG Systems

WORK EXPERIENCE

SDLC AI Automation Intern | *ORBCOMM Technologies India Pvt Ltd — Hyderabad, India* May 2026 - Aug 2026

- Built an organization-wide agentic unit-test analysis and implementation system that pulls repositories, analyzes code and existing tests, runs and repairs test suites, implements missing tests, and opens pull requests autonomously.
- Designed the agent to be technology-stack agnostic across languages, frameworks, and build systems, with comparable effectiveness on legacy codebases and active-development projects.
- Built the foundation of a system now being considered for broader testing automation at ORBCOMM, including integration and end-to-end testing beyond unit tests.

Software Intern | *Benfornia LLP — Karnataka, India* Dec 2025 - Feb 2026

- Implemented agentic AI solutions for proprietary internal software platform tools.
- Enhanced and maintained the T-Desk tool and Benfornia website.

Intern | *Anvisol LLP — Telangana, India* May 2025 - Aug 2025

- Implemented AI agent workflows and automation systems for business process use cases.

Intern | *Prometheus Patent Services — Telangana, India* Dec 2024 - Feb 2025

- Helped implement RAG AI systems for the patent office.

Robotics Club President | *Enigma Robotics — Karnataka, India* Mar 2025 - Mar 2026

- Rebuilt club culture around merit-based systems and instituted blind technical assessments to focus evaluation on work quality.
- Planned and built robotics, IoT, and AI projects over several months.

PROJECTS

Hexapod Robot

6-legged robot with vision navigation for autonomous obstacle detection and avoidance.

Polymarket Bot

Automated trading bot for Polymarket prediction markets.

RL/PPO Drone Simulation Sandbox

Built a reinforcement-learning drone simulation sandbox for training and evaluating control policies with Proximal Policy Optimization (PPO), focused on sim-to-real robotics experimentation.

VOLUNTEER & ACTIVITIES

Grace Foundation 2022 - 2024

Volunteered at fundraising runs for cancer treatment awareness; assisted with event coordination.

Community Fundraisers 2022 - Present

Organized fundraising events; mobilized resources and coordinated volunteer efforts.

Astrophotography 2020 - Present

Self-taught astrophotography, capturing astronomical phenomena and studying celestial bodies.

EDUCATION

B.S. in Computer Science 2026 - 2028 (Expected)

Rutgers University - New Brunswick, New Jersey

IB Program 2017 - 2024

Sreenidhi International School, Hyderabad

SCORES

SAT 1470 (Math: 770 | EBRW: 700)

IELTS 8.0 (L: 9.0 | R: 8.5 | W: 8.0 | S: 7.5)
